

UNTICK the things you don't want BEFORE you click the download button

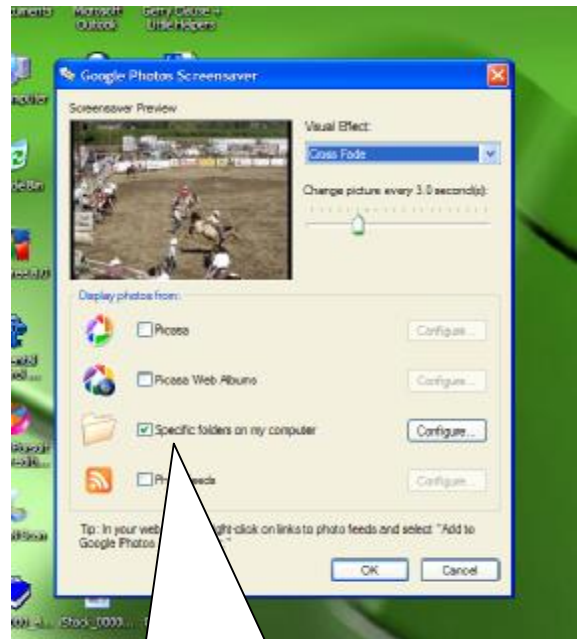

On this screen click "Google Screen Saver" which will be in this box IF you don't have it installed. (Here it IS already installed so it's in the grey box)
When you're ready click the big grey button [Download now]

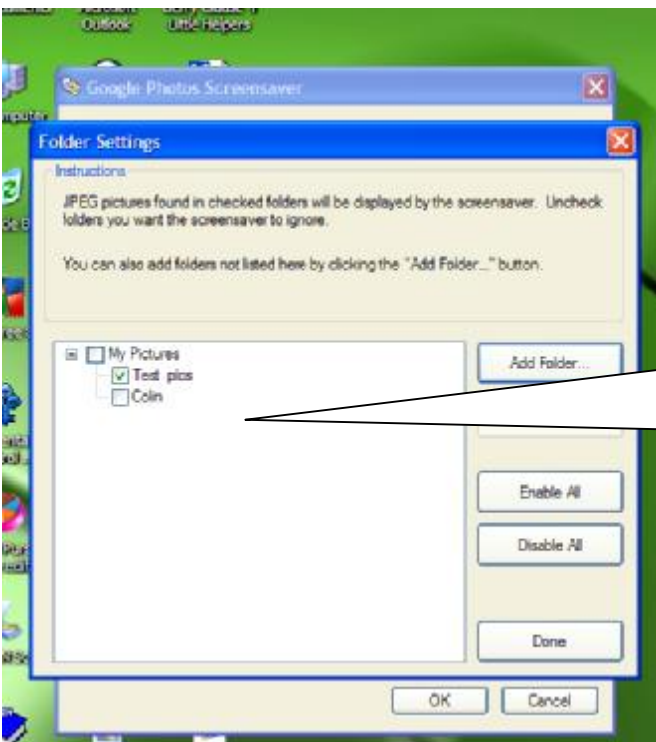

There is an option to "configure" it at the beginning BUT at any time go to [Start] - find "Google Photo Screensaver" and pick the "Configure Google Photo Screensaver"

In this box click [Configure] - when you finish you can try the [Preview] button to see what will happen

To select a folder of pictures - untick everything else and just tick the "Specific folders.." - Then click [Configure]

Tick the folder you want to use and click [Done]

You need to set up this folder first in My Pictures
