

How to Bookmark your Favourites in Firefox

Here's a quick way to Bookmark, or save your favourite pages in Firefox.

When you find a website that you like click on "Bookmarks" here

From this menu select "Bookmark This Page"

In this window make sure it says "Bookmarks Menu" here - if not click the little arrow at this side.

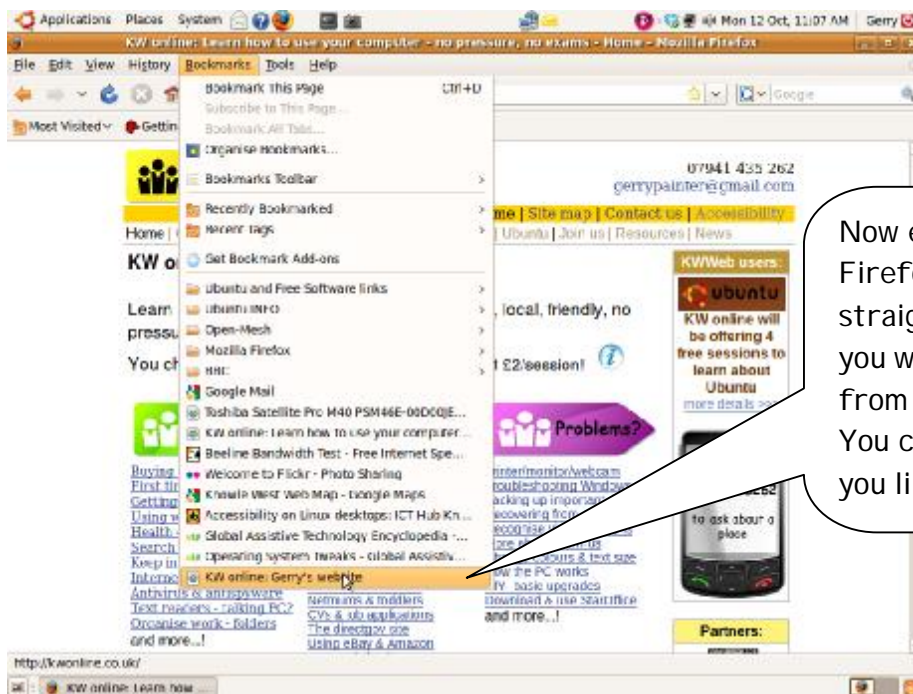

If you click the little arrow select "Bookmarks Menu" from the list - otherwise skip this step.

If you want to it's possible to change the name here so it's easier to recognise.

When you're happy, click the [Done] button.

Now every time you open Firefox you can go straight to the website you want by clicking on it from your Bookmarks. You can add as many as you like.
