

www.naturalreaders.com - A text reader for almost anything.

Start the reader either from the icon on

the desktop

or from Start > Programs > Natural Soft > Free Natural Reader > Natural Reader 2007

This is the main window for Natural Reader. To read text from other programs click on the Miniboard button

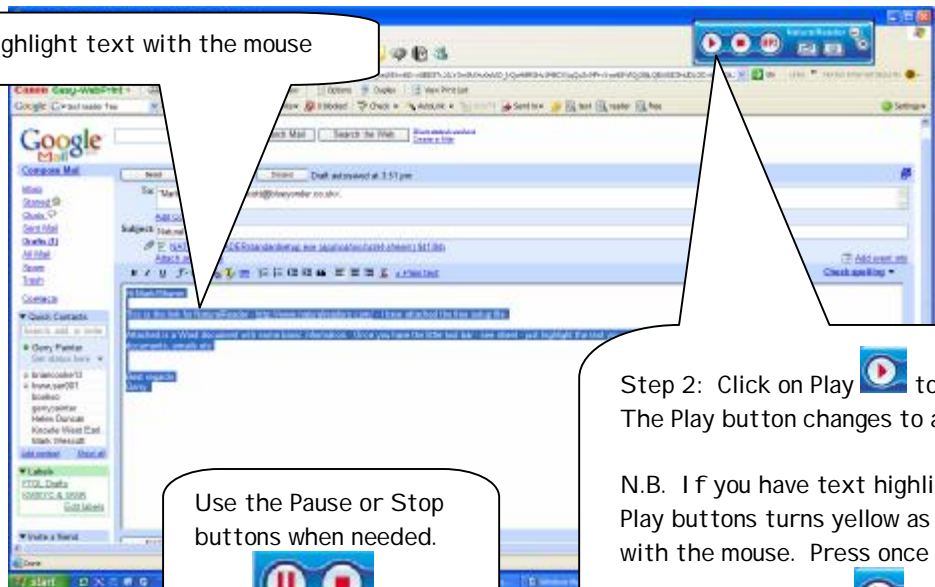

Click on the [Go to Miniboard] button to reduce it to a small "tool bar" that can be moved or dragged around the screen - it automatically goes top right

Highlight text with the mouse then use the Play button to read text.

Open any document, websites, Word, emails etc. just highlight the text and press the RED play arrow in the small toolbar.

Step 1: Highlight text with the mouse

Use the Pause or Stop buttons when needed.

Step 2: Click on Play  to start reader. The Play button changes to a pause button

N.B. If you have text highlighted the red Play buttons turns yellow as you 'hover' over it with the mouse. Press once to start.

The trial version is free.

For \$39 you can download a version with better speech & the option to turn the text into an MP3 file to be played on your I-Pod etc. - see site for details.
